

Fundamental Principles of Enterprise Engagement, ISO Annex SL and ISO 10018

Enterprise Engagement Definition: A strategic and tactical process to achieve organizational results by fostering the proactive involvement of all stakeholders who can contribute to organizational success.

ISO Annex SL and ISO 10018 Quality People Management Standards. All 60 ISO management standards affecting up to 2 million companies now require a formal, written CEO-led process to engage all stakeholders in the organizational mission and be able to demonstrate how the plan is implemented at the strategic and tactical level.

While an organization is granted great leeway in its journey to certification, it must be able to disclose a strategic and tactical plan addressing all related stakeholders with measurable results. Companies that follow the new ISO 10018 Quality People Management certification will effectively meet the requirements of Annex SL at the same time. ISO considers these new leadership principles critical to the success of any organization, whether they are ISO certified or not.

What's New: Enterprise Engagement and the related ISO Annex SL and ISO 10018 standards do for stakeholder engagement what ISO 9001 quality standards and methods such as Six-Sigma have accomplished for manufacturing and logistics: enhance efficiency and improve performance through a strategic and systematic approach. The standards require a formal proactive, strategic effort led by the CEO and all levels of management, and the company must have a system that connects all the dots between objectives, management, all stakeholders, etc. to clear strategies, tactics, and measures.

Benefits: Greater financial return and share-price performance for public companies through a better experience for customers, employees and all stakeholders; reduced reputation and litigation risks; lower marketing and recruitment costs; greater efficiency; enhanced safety and occupational health, and greater community support.

Timeline for Emergence of the Enterprise Engagement Field and ISO Annex SL and ISO 10018 Certification

1980-2000: Formative period. Visionaries in quality management and marketing identify the need to authentically address the people issue, including: W. Edward Deming, Peter Drucker, Tom Peters, Curt Coffman, Marcus Buckingham, Seth Godin. University of Luton in the U.K. publishes study identifying link between customer and employee engagement.

2002-2008: First Formal Research Institute Founded. The [Forum for People Performance Management and Measurement](#) is founded at Northwestern University in 2002 that conducts six years of research from 2002 to 2008 that further helps identify the connection between customer and employee engagement and organizational performance.

2005: First National Business Media Reference. Harvard Business Review publishes the ground-breaking article, [Manage Your Human Sigma](#), by Gallup consultants demonstrating a clear link between customer and employee engagement.

2008: Enterprise Engagement Alliance Formed to Create Formal Roadmap and Curriculum. Several dozen corporate practitioners, solution providers and academics form the Enterprise Engagement Alliance at [TheEEA.org](#) to create a formal curriculum on how to implement an enterprise approach to engagement in a measurable way.

2009: First Enterprise Engagement Curriculum Launched at [EEA.tmlu.org](#); [Enterprise Engagement: Roadmap](#) published.

2012: Stock Index Created. The EEA creates the first [Engaged Company Stock Index](#), which has consistently outperformed the S&P 500 and is now 40 percentage points higher than the S&P.

2013: ISO Recognizes the Human Factor. The International Organization for Standardized recognizes that it has overlooked the human factor in standards and publishes [Annex SL requirements](#) that now apply to 60 ISO Standards, including ISO 45001, along with [Quality People Management standards](#) that reflect Enterprise Engagement principles.

2016: Investors Awaken. [Investors](#) join forces to promote disclosures of human capital investments and outcomes.

2017: First Certification for ISO Annex and ISO 10018 Certification; Investor Pressures Mount. The International Center for Enterprise Engagement at [TheICEE.org](#) is formed to create the first formal certification for ISO 10018 quality people management. Nearly [\\$15.7 trillion in investment](#) capital calls for engagement disclosures in SEC filings.

2018: Formal Academic Recognition; corporations embrace human capital. The [Academy of Management](#), the world's largest organization of management academics, sponsors a symposium on Enterprise Engagement at its annual conference. JUST Company ETF focused on people raises record \$215 billion on its first day.

2019: Annex SL in Full Effect. Starting in 2019, [Annex SL](#) will be required at up to [2 million companies](#), which will now have to demonstrate a formal human capital and enterprise engagement plan directed by the CEO. ISO releases new 30414 Guidelines for Human Capital disclosures.

Enterprise Engagement Information Resources

Overall Information

TheEEA.org: Complete information on the field, Enterprise Engagement services, and the Engaged Company Stock Index.

Free eBooks

The Enterprise Engagement Alliance maintains eBooks on many engagement topics, including:

Enterprise Engagement and ISO Standards: A guide to ISO Annex SL and related standards.
